

=> Standard Errors :

200 - Status ok (Perfect Execution)

201 - Data Receiving

304 - Method not found

404 - Not found error

500 - Internal Server Error

=> Template Rendering :

L> Create a directory

MVT
Model View Template

↳ Create a directory
name 'templates'

Model
(DB)

View
(py)

template
(HTML)

↳ Render using j2.

⇒ Jinja Templating: Passes parameters
from server to template.

⇒ Requests:

↳ Methods are always called as
GET naturally.

↳ Assign method triggers separately.

↳ Conditions should be strong for
combined methods.
